

Do You Trust SBC and Comcast?

They say the broadband referendum is as risky as betting on horses, playing roulette, or rolling dice.

They say the Tri-Cities are gambling with your tax dollars. Do you think SBC & Comcast really care about your taxes?

We care about what they don't say:

The proposed broadband utility will pay for itself through user fees without tax increase.

SBC & Comcast are concerned about the significant competition this utility will bring to the Tri-Cities.

Tri-Cities residents and businesses have been demanding better service for many years without response.

A Tri-City all-fiber network will be far superior to their most recent upgrades to their 20-year-old infrastructure.

Telecommunications services are currently provided by more than 500 municipalities. Every single one is a success.

They have gambled a fortune of your subscriber fees on misleading advertising to keep you from having a choice.

**SBC & Comcast want to profit at your expense. We want to secure your future.
True Local Service. True Local Accountability. And Your Money Stays Here.**
